MOTORCYCLE  
PRODUCTS

*Regain control of your  
Fuel Injected Ride!*

**IMPROVES MILEAGE** while increasing **POWER** and **TORQUE**  
for stock and modified applications... plus reduces emissions

**AUTOMATIC RE-CALIBRATION** - optimizes for modifications such as exhaust pipes, intake, air cleaners, cams, etc

**EASY INSTALLATION** - direct plug-in connections to factory Throttle Position Sensor, Crank Position Sensor and O2 Sensors

**SELF LEARNING** - automatically compensates for changing loads, weather conditions and altitude while you ride: no need for costly dyno tuning sessions or downloading calibration files to a lap top

**SMOOTHER RUNNING ENGINE** - Eliminates the "bang & pop" associated with mis-programmed ECU due to intake and exhaust modifications and no need to re-flash the factory ECU; simply plug it in and ride
