## ANCHORTRAX – PET RESTRAINT KIT

**Brand:** Mr. Gasket

**Available:** 4/16/2008

**Part Number:** 3205

### PRODUCT DESCRIPTION

Anchortrax Pet Restraint kit is perfect for securing your pet in the bed of your pick-up truck or livestock trailer. This 12" inch product actually installs easily with stainless steel cap screws into the countersunk holes. The track is .5" high by 1.25" wide and 12" long. The kit package includes one section of 12" track, one heavy-duty back plate, one sliding loop harness and all mounting bolts required. The countersunk holes provide more usable harness positions.

### FEATURES & BENEFITS

AnchorTrax is constructed of 6061-T6 aluminum and provides a 3,000 lb. break strength with a 1,000 lb. working load limit. It also has a powder-coated finish for durability and good looks. Each track provides multiple harness points using a loop that slides along the track then locks into place where needed. Please note, it is very important to install the track in the center of the truck bed, to make sure your pet cannot jump out of the truck!

### APPLICATIONS

This Pet Restraint kit is so universal in design, it will work anywhere in livestock trailers or Pick-up trucks.
